Site: 001
BIOQUAL INC

Type: ROUTINE INSPECTION
Date: 10-AUG-2021

3.75(c)(1)

Housing facilities, general.

Many of the rooms on the 3rd floor of the facility have damaged dry wall due to water damage. The walls in multiple rooms have peeled paint or surfaces. Also, some rooms have rough surfaces that are unsealed. The surfaces that make up the housing facilities for the non-human primates are made of a material that is not able to withstand the frequency of cleaning and sanitization. The facility tested options to A plan to address the cause of the damage must be identified and Methods to prevent damage to the walls must be implemented to facilitate husbandry practices implemented. Correct by November 30, 2021

3.84(d)

Cleaning, sanitization, housekeeping, and pest control.

Three live roaches were seen on the wall of one room on the 3rd floor of the facility. The room had some areas of drywall that was peeling due to excessive moisture in the room from a recent wash down. The level of moisture in the room after cleaning may contribute to the presence of the pests. A pest control program must be effective in preventing the attraction or harborage of pests. Effective measures must be implemented to minimize the harborage of pests. Correct by October 15, 2021

This inspection and exit interview were conducted with the facility representatives.
