INSTITUTE OF TECHNICAL ARTS LLC

Type: ROUTINE INSPECTION
Date: 17-MAR-2015

2.31(c)(1)

INSTITUTIONAL ANIMAL CARE AND USE COMMITTEE (IACUC).

The IACUC had their last meeting on August 12, 2014. The next meeting should have been on, or before, February 12, 2015.

The IACUC shall meet & review, at least once every 6 months, the facility's program for humane care and use of animals.

Correct by April 15, 2015

2.31(c)(3) REPEAT

INSTITUTIONAL ANIMAL CARE AND USE COMMITTEE (IACUC).

Currently, the IACUC is only using one member to conduct the required semi annual site visit during their January 2015 inspection.

A minimum of 2 IACUC members is required to conduct any evaluations of the facility's programs and facilities; providing further that no committee member wishing to participate in any evaluation may be excluded.

The IACUC developed a checklist since the last inspection that the member is using to provide guidance during the facility inspection which has 3 columns: "A", "M", & "S". The IACUC member that performed the last inspection indicated that the "A" column stands for items that are checked annually, "M" is for items that are checked monthly, & "S" is for items that are checked semiannually (the common nomenclature used for these types of checklists for these letters are: "A" indicates Acceptable, "M" indicates Minor deficiency, & "S" indicates Significant deficiency).

All applicable items are to be reviewed at least once every 6 months. There is no mechanism for identifying significant deficiencies from minor deficiencies which must be reported to the Institutional Official & APHIS if not corrected within 15 days

Inspection Report

2.31(d)(5)

INSTITUTIONAL ANIMAL CARE AND USE COMMITTEE (IACUC).

There are 33 protocols, all of which were last reviewed, and approved, by the IACUC on 2/26/14. The IACUC shall conduct continuing reviews of activities at least yearly.

Correct by April 15, 2015

2.31(e)

INSTITUTIONAL ANIMAL CARE AND USE COMMITTEE (IACUC).

Several protocols involve teaching the students venipuncture or intravenous injections. None of the protocols (with the exception of the rabbit) indicate how much blood will be withdrawn or the amount of fluid that would be injected into the animals.

These protocols shall be revised, and approved by the IACUC, to indicate the volumes of blood that will be withdrawn and the amount of fluids that will be injected into each species of animal.

Correct by April 15, 2015

2.38(a)

MISCELLANEOUS.

The registrant did not have a copy of the June 2014 semiannual facility inspection for review. This is required to determine compliance with the applicable regulations.

A research facility shall furnish to any APHIS official any information concerning the business of the research facility which the APHIS official may request in connection with the enforcement of the provisions of the Act, the regulations, and the standards.

Correct immediately.

The exit interview was conducted with the Program Coordinator.
