Type: ROUTINE INSPECTION
Date: 13-JAN-2025

2.40(b)(3) Direct

Attending veterinarian and adequate veterinary care (dealers and exhibitors).

Two adult pigs housed in the front barn have severely overgrown hooves on all four feet. The hooves have started to curl upward and the length of the hooves is causing the pigs to have an abnormal and shuffling gait. When asked, the facility stated that they had not noticed that their hooves were overgrown.

Additional animals on the property had overgrown hooves but did not show signs of abnormal gait. These animals included one cow, one zebu, and two hair sheep. The facility also did not observe that these hooves were overgrown. Overgrown hooves can cause pain and discomfort, and lead to abnormal gaits. Inadequate daily observations can lead to the prolonged suffering of animals when changes in their health are not noticed in a timely manner. The facility must ensure that all animals are observed daily to assess their health and well-being and then ensure a mechanism of direct and frequent communication with the attending veterinarian.

The two pigs in the barn must obtain care for their hooves by close of business on 1/14/2025.
The one cow, one zebu, and two hair sheep with overgrown hooves must obtain care by 1/27/2025.

A complete routine inspection was conducted on 13 JAN 2025. This inspection report is limited to the Direct non-compliances identified during that inspection. An additional inspection report will be delivered with the other issues identified during this inspection.

This inspection and exit interview were conducted on 13 JAN 2025 with a facility representative.
