2.40(a)(1)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

2.40 (a) (1) The program of veterinary care is incomplete. There is no guidance or recommendations for several of the species that were on hand at the time of inspection including: ferrets, swift foxes, red foxes, coyotes and wolves. The lack of adequate veterinary guidance for prevention, control, diagnosis, and treatment of diseases and injuries does not ensure that problems of animal health are addressed adequately for these species. The written program of veterinary care should include detailed guidance for all species on hand or under the licensee's possession or control that are for regulated purposes.

Establish a detailed written program of veterinary care that includes all species purchased, held, or otherwise acquired by the licensees for regulated purpose.

To be corrected by: June 29, 2016

Inspection and an exit briefing were conducted with a facility representative.
