Customer ID: **3419**

Certificate: **91-C-0006**

Site: 001

OLYMPIC GAME FARM, INC.

Type: ROUTINE INSPECTION

Date: 21-MAR-2017

2.40(b)(2)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

Several prescription medications for the animals had not been given by the facility as directed by the attending veterinarian.

- A prescription for the 4 yr old male coyote "Koda" for a leg injury was dated 8/15/16 for Clindamycin 75 mg (28 capsules). This antibiotic was to be administered until finished; however, all 28 capsules were present in the bottle.
- A prescription for the 9 yr old female lynx "Persia" for a leg injury dated 10/14/16 for Baytril 136mg (14 tablets) was to be given until finished. All 14 tablets remained at the time of inspection.
- For the 24 yr old brown bear "Marsha", Meloxicam 15 mg was prescribed on 12/09/15 for the treatment of arthritis. 100 tablets were prescribed; however, 100 tablets were still present in the bottle.

Medications must be given as prescribed by the attending veterinarian, as they are important for controlling chronic conditions, treating medical conditions, and to enhance the overall long-term health and well-being of the animals.

Correct from this time forward.

The 4 yr old male coyote "Koda" was observed pacing inside its shelter several times during the inspection. Abnormal or repetitive behavior patterns can be indicative of physical or psychological issues that may require medical treatment. The animal must be evaluated by the attending veterinarian to receive any appropriate treatment or management.

Correct by: April 21, 2017

2.75(b)(1)

RECORDS: DEALERS AND EXHIBITORS.

The facility does not have a written record of animals on hand. Records enable the inspection process and provide traceability of animals, which can help protect their welfare. Records must be created and maintained for all regulated animals at the facility.

Inspection Report

Correct by: April 7, 2017

3.125(a)

FACILITIES, GENERAL.

The enclosures for the three tigers and the coyote have peeling paint, rust, and damaged wood present. These surfaces cannot be adequately cleaned and sanitized. The affected surfaces must be repaired or replaced.

Correct by: September 21, 2017

This inspection and exit briefing were conducted with the facility representative.

Additional Inspectors

Mckinnie Carolyn, Supervisory Animal Care Specialist
