Type: ROUTINE INSPECTION
Date: 02-DEC-2015

2.31(d)(1)(8)

INSTITUTIONAL ANIMAL CARE AND USE COMMITTEE (IACUC).

An protocol approved by the Institutional Animal Care and Use Committee (IACUC) involving terminal thoracotomy on rabbits was being conducted at the time of inspection. During the review of records, it was discovered that the individual conducting the experiments on this day was listed in the approved protocol, but her training and experience section was left blank, (others listed had a description of their training and / or experience). The training records on file did not show that she had been trained on thoracotomy on rabbits, although the individual and the facility representative maintain that she was trained on this procedure three years ago, but that it had not been appropriately documented.

Prior to approving a protocol, the IACUC should ensure that all personnel have, or will receive appropriate training prior to engaging in covered activities. It is essential that the IACUC be provided with accurate and timely information so that they can conduct a thorough review of proposed activities prior to approval. Failure to ensure adequate training could put the welfare of the animals at risk.

To be corrected from this day forward.

An exit interview was conducted with a facility representative.

Inspection completed by Veterinary Medical Officers Dr. Pamela L. Smith and Dr. Katharine Frank.

Additional Inspectors

Frank Katharine, Veterinary Medical Officer
