Type: ROUTINE INSPECTION
Date: 15-AUG-2017

2.75(b)(1) REPEAT

RECORDS: DEALERS AND EXHIBITORS.

Records of acquisition and disposition for recently acquired rabbits and guinea pigs were not available at inspection. Every exhibitor must keep and maintain records which contain the required information on animals which are transported, sold, euthanized, or otherwise disposed of by that exhibitor. Facility corrected the records during inspection.

3.27(b)

FACILITIES, OUTDOOR.

Guinea pigs were housed outdoors in a hutch with the rabbits without a variance. The guinea pigs were removed from the rabbit hutch during inspection and placed in a transfer cage, but still need to be moved indoors or a variance obtained. Steps should be taken immediately to ensure the well-being of the guinea pigs, and the licensee should either request and be granted permission for outdoor housing, or make other arrangements for housing guinea pigs

Correction date: 21 August 2017

3.33(b)

CLASSIFICATION AND SEPARATION.

The facility is currently housing guinea pigs with rabbits in the same outdoor hutch. The guinea pigs and 4 additional rabbits were recently acquired as a group and showed no signs of incompatibility. Housing guinea pigs with other species may affect their health and well-being and increase their risk of injury. A system should be in place and maintained to ensure guinea pigs are not housed in the same primary enclosure with any other species. The guinea pigs were removed from the enclosure during inspection and placed in a temporary transfer cage.

Inspection Report

CLASSIFICATION AND SEPARATION.

Rabbits and guinea pigs were housed together in an outdoor hutch. The guinea pigs and 4 additional rabbits were recently acquired as a group and showed no signs of incompatibility. Rabbits shall not be housed in the same primary enclosures with any other species of animals, because housing rabbits with other species may affect their health and well-being and increase their risk of injury. The guinea pigs were removed from the enclosure during inspection and placed in a temporary transfer cage. A system should be in place and maintained to ensure rabbits are not housed in the same primary enclosure with any other species.

Correction date: 21 August 2017

This inspection and exit interview was conducted with facility representatives.
