Type: ROUTINE INSPECTION
Date: 17-JUL-2014

2.75(b)(1)

RECORDS: DEALERS AND EXHIBITORS.

Section 2.75(b)(1) Records: There were 15 rabbits observed during this inspection, but only 10 rabbits were included in the records. Animal records are used for animal tracking and during the evaluation of the facility's programs for veterinary care and animal husbandry. The records must include the following information: name and address of the person from whom the animals were purchased/acquired; the USDA license/registration number or if unlicensed, the vehicle license number and State and the driver's license number and State; the name and address of the person to whom the animal was sold/given; the date of the transaction; the species of animal; and the number of animals involved. Records must be maintained on all animals acquired/held, including any offspring born of any animal at the facility.

Correct by July 24, 2014.

3.56(a)(1)

SANITATION.

Section 3.56(a)(1) Cleaning of primary enclosures: The floor of the hutches were wet with an accumulation of feces in three enclosures housing one rabbit each and in one enclosure housing three rabbits. Wet floors and feces can provide an optimal area for the growth of bacteria and mold/fungi which may cause the rabbits to become ill. The hutches must be kept reasonably free of excreta for the health and comfort of the rabbits. The feces and soiled bedding were removed during the inspection. The cleaning of the rabbit hutches must be improved.

Correct from this day forward.

An exit briefing was conducted with the daughter.
