3.80(a)(2)(ix)

Primary enclosures.

The outdoor portions of all non-human primate enclosures are constructed with wood permeable to moisture and cannot be readily cleaned or sanitized. The framework of the enclosures as well as some built in perches and dens are not designed or constructed in a way that they can be easily removed once they become worn or soiled. Having surfaces in contact with the animals that cannot be readily cleaned and sanitized can expose the non-human primates to unnecessary disease hazards. Correct by June 15, 2023 by ensuring that all surfaces in contact with non-human primates are constructed in a manner that enables them to be readily cleaned and sanitized or replaced when worn or soiled.

This inspection and exit interview were conducted with the licensee.
