3.127(d)

Facilities, outdoor.

The enclosure housing the fox is not completely surrounded by a six foot perimeter fence. Approximately one-half of the perimeter fence is less than six feet in height. Lack of a complete six foot perimeter fence cannot protect the fox by restricting unwanted animals and unauthorized persons from going through it or under it and having contact with the fox. It also cannot function as a secondary containment system. A six foot high perimeter fence must completely surround the fox enclosure. Correct by October 31, 2024.

This inspection and exit interview were conducted with the facility representative.
