Customer ID: **502434**  
Certificate: **88-C-0216**  
Site: 005  
SEAQUEST HOLDINGS, LLC

Type: ROUTINE INSPECTION  
Date: 22-OCT-2019

### 3.58(a)

#### CLASSIFICATION AND SEPARATION.

Two rabbits are being housed together with a Toucan in the indoor primary enclosure. Rabbits are a prey species and can become easily stressed when housed with other animals. Rabbits housed with other species may have a negative impact on the health of either animal due to potential spread of disease and contamination. Rabbits must not be housed in the same primary enclosure with another species unless required for scientific reasons.

To be corrected by: Corrected during time of inspection

### 3.125(a)

#### FACILITIES, GENERAL.

The back wall of the indoor enclosure housing the two wallabies has two holes. The drywall is exposed in both the holes and white chalk is flaking off onto the ledge. These areas are not in good repair and the exposed drywall could be a health hazard to the animals if ingested. Construct and maintain the indoor facilities so that they are structurally sound and in good repair to protect the animals.

To be corrected by: October 28, 2019

This inspection and exit briefing were conducted with the General Manager.

#### Additional Inspectors

Price Katie, Veterinary Medical Officer
