Type: ROUTINE INSPECTION

Date: 04-APR-2017

### 3.31(b)

#### SANITATION.

Section 3.31(b) Housekeeping: In the Hut building the racks with the hamster enclosures and the attached water hose had excessive accumulations of bedding dust. The wall filter and the ceiling vent in the hamster area also had an excessive accumulation of bedding dust. Excessive dust may affect the ventilation system and will accumulate on the animal enclosures and food. The animal racks, water hose, ceiling vents and filters must be cleaned more frequently to prevent the accumulation of an excessive amount of dust on surfaces to protect the health of the animals and to promote the efficiency of the ventilation system for the room. Correct by April 7, 2017.

This inspection and exit interview were conducted with the facility president.
