Site: 001

FRISKY'S WILDLIFE & PRIMATE  
SANCTUARY, INC.

Type: ROUTINE INSPECTION

Date: 07-SEP-2023

---

### 2.40(a)(1)

#### Attending veterinarian and adequate veterinary care (dealers and exhibitors).

The current written Program of Veterinary Care does not include the avian species: 1 great horned owl, 3 African Grey parrots, and 5 chickens. The program of veterinary care should include standards of care for all regulated species that are exhibited. The facility written program of veterinary care must be updated by the attending veterinarian to ensure the birds receive the appropriate diagnosis and treatment of health conditions. Correct by October 30, 2023.

### 3.154

#### Environment enhancement to promote psychological well-being.

The birds at the facility were appropriately housed and provided with materials and activities to enhance their environment. However, a written plan to include these provisions to improve the well-being of the birds had not been developed and approved by the Attending Veterinarian.

Per this Section, exhibitors must develop, document, and follow a species-appropriate plan for environment enhancement to promote the psychological well-being of birds. The plan must be in accordance with currently accepted professional standards as cited in appropriate professional journals or reference guides. At a minimum, the plan must address each of the following: social grouping, environmental enrichment, special considerations, restraint devices, and exemptions (if applicable). A written environmental enrichment plan, appropriate for the species of birds maintained, must be developed and approved by the Attending Veterinarian. Correct by October 30, 2023.

This inspection and exit interview were conducted with the licensee.
