Sondra Reeves

Type: ROUTINE INSPECTION
Date: 14-SEP-2016

3.125(a)

FACILITIES, GENERAL.

In the enclosure housing sheep, goats, and zebu the shelter is in disrepair. One tin wall is detached from the frame causing numerous sharp points to be exposed. There is a broken base board along this detached wall. Damaged facilities and exposed sharp points pose a potential injury risk to enclosed animals. The licensee must repair or replace these physical structures to protect the welfare of the animals.

Correct by: 28 September 2016

This inspection and exit interview were conducted with facility representative.
