

## Inspection Report

Javon Stacks  
45900 Marriott Ave  
Belleville, MI 48111

Customer ID: **44669**  
Certificate: **34-C-0300**  
Site: 001  
JAVON STACKS

Type: ROUTINE INSPECTION  
Date: 15-JUN-2015

### 2.40(a)(1)

#### ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

The program of veterinary care has a lack of all the appropriate information for the species being exhibited. Sections of the (PVC) that include vaccinations, ectoparasite treatments, euthanasia procedures and all other topics that were discussed with the licensee are left blank. The frequency of the amount of visits is left blank. The (PVC) must be updated by the attending veterinarian to allow Aphis inspectors to evaluate that each species is getting proper care. The licensee must have the (AV) complete and update the program of veterinary care and sign and date the updated form.

Correct by 7-15-15

### 3.125(a)

#### FACILITIES, GENERAL.

The window blind located directly behind the capybara is in need of repair. The capybara has the ability to make contact with the blind that covers the bottom of the window and has left it in mangled condition. The capybara can injure itself on the sharp edges or ingest small pieces by chewing on it. The licensee must replace the window blind behind the capybara to protect the health of the animal.

Correct by 6-17-15

### 3.126(b)

#### FACILITIES, INDOOR.

The enclosure that is currently housing an adult capybara does not have adequate ventilation. The capybara is housed in a press board type enclosure with a lack of ventilation. Lack of proper ventilation will cause veterinary health problems that will get serious as temperatures get hotter in the summer months. The licensee must increase ventilation by using fans and providing more air flow to the enclosure.

Correct by 6-17-15
