Site: 001

GRIZZLY DISCOVERY CENTER, INC

Type: ROUTINE INSPECTION
Date: 14-JUN-2016

3.125(a)

FACILITIES, GENERAL.

This facility had 12 ground squirrels on their last inspection dated July 1, 2015. Since that time frame, the director indicated that they had 2 squirrels escaped from the enclosure. The facility has made changes to the rear wall in an attempt to keep the squirrels contained within their enclosure. However; they had 4 squirrels that were unable to be found or located between fall of 2015 and spring of 2016. It is unclear at this time the actual disposition of these animals or when these animals disappeared from the facility. This facility must ensure that there are methods in place to monitor animal movements to identify animal escapes in a timely manner. In addition; all enclosures must be constructed and maintained in a manner that will securely contain the species of animal contained therein.

Correct by: 9/21/2016

The inspection and Exit was conducted with the Director.
