Arbuckle Adventures L L C
6132 Kay Starr Trail
Davis, OK 73030

Customer ID: **324698**
Certificate: **73-C-0190**
Site: 001
ARBUCKLE ADVENTURES LLC

Type: ROUTINE INSPECTION
Date: 28-JUN-2016

3.125(a) REPEAT

FACILITIES, GENERAL.

- In the Jacobs sheep enclosure, a section of wire fence was detached from the adjacent support post leaving a small gap with multiple exposed sharp points. This is a potential source of injury to the enclosed animals. Fencing and other structures must be maintained in good repair to ensure the animals are safely contained within their enclosure.

Corrected at the time of inspection

3.131(a)

SANITATION.

- In the coatimundi enclosure, the cage had been spray cleaned. The straw bedding in the shelter had apparently not been removed, and was thoroughly wet. Bedding in the shelter will prevent the shelter itself from being adequately cleaned. Wet bedding may prevent the enclosed animal from even using the shelter, and could potentially cause skin irritation and discomfort if used by the animal. Shelter bedding should be completely emptied prior to enclosure cleaning. Once the shelter itself is dry, fresh bedding can be added as necessary.

Corrected at the time of inspection.

3.131(d)

SANITATION.

- In the walk through park, there was a large wasp nest at the top of the porcupine enclosure. Numerous wasps were present on the nest, and flying around the area. Insects are a potential source of injury or irritation to enclosed animals. The nest must be removed, and an effective pest control program implemented.

Corrected at the time of inspection.

Inspection and exit interview conducted by Michael Tygart (VMO), Brittany Light (ACI) and facility personnel.
