Type: ROUTINE INSPECTION
Date: 04-APR-2024

2.31(c)(3)

Institutional Animal Care and Use Committee (IACUC).

The IACUC meeting minutes and the corresponding report to the Institutional Official (IO) show that only one member of the IACUC committee participated in the December 2023 semiannual inspection of the registrant's facility. Failure to adequately inspect the facility can result in inaccurate semiannual reports to the IO who is ultimately responsible for compliance with the Animal Welfare Act.

When conducting the evaluations and inspections to prepare the reports to the IO, the IACUC may determine the best means of conducting evaluations of the research facility's programs and facilities as long as no Committee member wishing to participate in any evaluation conducted under this subpart may be excluded. The IACUC may use subcommittees composed of at least two Committee members and may invite ad hoc consultants to assist in conducting the evaluations. To be corrected by 22 April 2024 and with all future program and facility reviews and semiannual reports to the IO.

2.31(d)(1)(iii)

Institutional Animal Care and Use Committee (IACUC).

The one active protocol for ongoing activities involving the animal at this facility is an observational study of enrichment in a nonhuman primate. The IACUC has approved this ongoing protocol with no written assurance from the Principal Investigator that the activities do not unnecessarily duplicate previous experiments. Failure to require this assurance can result in unnecessary use of animals in research. The IACUC must determine that the proposed activities or significant changes in ongoing activities meet the all requirements including that the principal investigator has provided written assurance that the activities do not unnecessarily duplicate previous experiments. To be corrected by 22 April 2024

2.31(e)(2)

Institutional Animal Care and Use Committee (IACUC).

The one protocol to document ongoing activities involving the animal at this facility is an observational study of enrichment in a nonhuman primate. The IACUC has approved this ongoing activity without a rationale for the appropriateness of this species or for the number of animals used. Failure to require this information can result in inappropriate use of animals in research and unsatisfactory scientific outcomes. The IACUC must ensure that a proposal to conduct an activity involving
