Certificate: 41-A-0248
Site: 001
JOHN AND LYLE RENNER

Type: ROUTINE INSPECTION
Date: 28-JAN-2015

3.1(e)

HOUSING FACILITIES, GENERAL.

Storage.

Several feed bags stored near the husky barn to be used to feed 11 dogs showed evidence that pests had been present in and around the feed bags. One bag with a tear had not been evaluated for contamination or transferred to a closed container. Spilled feed was observed around the storage area. This condition of the food storage area can attract pests to the area and may contaminate feed fed to the dogs. Contaminated feed is a health risk to the dogs if ingested. Clean and maintain the storage of extra feed in a manner that prevents contamination and attraction of pests. Correct by: 2 February 2015

The adequate veterinary care issues for dogs #0A01575807 and #0A01575665 cited under 2.40 (b) (2) on the previous inspection have been addressed and were corrected at the time of this inspection.

Inspection and exit briefing conducted with licensees.

End of report.

Additional Inspectors

Welch Scott, Veterinary Medical Officer

Prepared By: DEBRA SIME, D V M USDA, APHIS, Animal Care
