HOLM SMALL PET TRANSPORT
LLC

Type: ROUTINE INSPECTION

Date: 08-SEP-2021

2.131(e) Critical

Handling of animals.

Four Hedgehogs and three puppies died while in the possession of this transporter. The registrant stopped to rest during a transport at about 6pm on 31 Aug 2021. At approximately 9pm, she checked on the animals and found the air conditioning system was not operating correctly and warm air blowing from the air vents. She checked the animals in the rear of the vehicle at that time and found the deceased animals. Failure to protect animals from harmful ambient temperatures can lead to heat stress and even death. When climatic conditions present a threat to an animal's health or well-being, appropriate measures must be taken to alleviate the impact of those conditions. The transporter must ensure that all animals never be subjected to any combination of temperature, humidity, and time that is detrimental to the animal's health or well-being, taking into consideration such factors as the animal's age, species, breed, overall health status, and acclimation. To be corrected by 9 Sept 2021.

This inspection and exit interview were conducted with the facility representatives.
