Type: ROUTINE INSPECTION
Date: 05-AUG-2024

3.131(c)

Sanitation.

The sheep pasture immediately adjacent to the barn contains a heap of fencing material with multiple mangled, projecting wires. There is also a section of the barn's metal wall panel that has been bent outwards, creating an opening in the wall and exposing the curved edge to the pasture. The fencing material and metal panel damage can entrap or injure animals in the pasture. Buildings and grounds of the premises must be kept clean and in good repair to protect animals from injury.

Correct by August 19, 2024.

This inspection and exit interview were conducted with the licensee.
