### 3.125(a)

#### Facilities, general.

Four animal enclosures were observed to be in minor disrepair: the highland cattle had two loose boards with exposed screws sticking out in their feed shed; the alpaca shed had a small window pane with a section of broken glass where animals had access to it; the fennec foxes had a @2x6 inch section of loose wire with exposed sharp ends, and the fallow deer had a metal trash can with broken and sharp edges used as a cover for equipment in a corner of the enclosure behind a shed. Exposed sharp edges in animal enclosures may injure animals. The facility must ensure that the enclosures are maintained in good repair to protect the animals.

Correct by June 16, 2023.
