Site: 001
JOHN AND LYLE RENNER

Type: ROUTINE INSPECTION
Date: 07-MAY-2014

2.40(b)(2) REPEAT

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

An Italian Greyhound (microchip #106810261) was observed to have an irregular shape to its muzzle. Observation of the mouth showed grayish material on several of the upper teeth. The outline of the teeth cannot be seen. There were also some lower and upper teeth missing. While the facility has a dental program in place (this dog had its teeth cleaned on 2/24/13), the facility is not following its dental program to prevent dental problems that can make it difficult for the dog to eat, can be painful and lead to other health problems. Have this dog evaluated for dental problems and provide treatment guided by the attending veterinarian. Ensure that the dental protocol outlined on the program of veterinary care is followed.

2.40(b)(3) REPEAT

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

An Italian Greyhound (microchip #106810261) was observed to have an irregular shape to its muzzle. Observation of the mouth showed grayish material on several of the upper teeth. The outline of the teeth cannot be seen. There were also some lower and upper teeth missing. While the facility has a dental program in place (this dog had its teeth cleaned on 2/24/13), the facility did not observe this dog in a timely manner to identify and prevent dental problems that can make it difficult for the dog to eat, can be painful and lead to other health problems. Ensure that dogs are observed often daily to identify medical issues that may lead to health problems.

Note: All previous adequate veterinary care issues cited under 2.40 on the previous inspection were corrected at the time of this inspection.

Inspection and exit briefing conducted with licensees.

End of report.
