299 N E 400
Clinton, MO 64735

Customer ID: 11169
Certificate: 43-A-4973
Site: 001
KIMBERLY COLEMAN

Type: ROUTINE INSPECTION
Date: 09-FEB-2017

3.6(c)(1)(iii)

PRIMARY ENCLOSURES.

* An enclosure contained two (10 week old) puppies, This enclosure had approximately 3 inches of head space above the puppies head when in a normal standing position. The enclosure did not provide the required 6 inches of additional head space. This reduced head space limits the puppies ability to stretch, stand, jump and play. Licensee must ensure that all enclosures housing dogs/puppies have the required 6 inches of additional head space above the tallest dog in the enclosure. (Corrected at time of inspection.)

* To be corrected by: 2/10/17

3.6(c)(2) DIRECT REPEAT

PRIMARY ENCLOSURES.

* At time of inspection two adult Shar-Pei's were housed together. Shar-Pei (# 000003236385) appeared and felt thin, with a defined waist and visible rib cage. She had blood matting down the hair around her right ear and fresh lacerations (approximately 1 1/2 in. long, with a loose skin flap hanging) on the lateral aspect of both hind legs. Licensee immediately removed the injured dog to a separate enclosure. Licensee must ensure that dogs that are housed together must be compatible to avoid any injury due to fighting and to ensure there is no display of food aggression that could compromise the nutritional needs of any of the dogs.

* To be corrected by: 2/9/17 (corrected at time of inspection)

This inspection and verbal exit interview were conducted with licensee on 2/9/17.
