Oklahoma City, OK 73108

Customer ID: 3955
Certificate: 73-B-1814
Site: 001
QUALITY PETS, INC.

Type: ROUTINE INSPECTION
Date: 17-DEC-2015

2.40(b)(2) REPEAT

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

- At the time of the inspection a chinchilla was individually housed and had lesions on both ears. The ears were red and had cuts and scabs present. The chinchilla's eyes were squinted and the animal's face appeared to be grimacing in pain or discomfort and it did not move in the enclosure the entire time the inspectors observed this animal. The facility representative stated the chinchilla was in a fight last week and was injured and under treatment. The treatment consisted of placing Neosporin on the ears. The inspector called the AV and the AV stated the animal had been examined in mid November but not since that time. According to the Attending Veterinarian the facility representative told the AV the animal was much improved since that time. The inspector asked the AV if he prescribed the Neosporin to be applied to both ears and he stated no that was not his treatment plan. The licensee must have all animals examined by the AV and follow the AVs instructions and treatment plans at all times.

2.40(b)(3) REPEAT

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

- There was a guinea pig that arrived at the facility 2 days prior to the inspection and had dry, crusty lesions on the back of the left ear and on the right side of the face by the nose. This animal was not under treatment at the time of the inspection. There was no documentation present that addressed these injuries or indicated that the attending veterinarian had been contacted. All animals must be observed daily and any veterinary care issues must be timely and accurately relayed to the attending veterinarian. The facility must make certain that a program is in place to ensure that all injured animals receive prompt and adequate veterinary care at all times.

Inspection and exit interview conducted with facility representative and USDA APHIS officials.

Additional Inspectors

Light Brittany, Animal Care Inspector
