VARIOUS TRAVEL LOCATIONS

Type: ROUTINE INSPECTION
Date: 18-AUG-2016

3.14(b)

PRIMARY ENCLOSURES USED TO TRANSPORT LIVE DOGS AND CATS.

The floor of the trailer where the dogs are housed is made of wood. The licensee said that the manufacturer claimed it would be waterproof, however inspectors had the licensee splash some water on the floor and later in the inspection the water was looked at. The water had partially soaked into the wood and when the excess water was wiped off, there was a wet spot of water soaked into the wood. This is indicative that the floor surface is not impervious to moisture and cannot be adequately sanitized. Unsealed wood that is not impervious to moisture cannot be sanitized according to AWA regulations and standards required in 3.11(b)(3) and create a source for bacteria. The licensee must make the floor surfaces that the dogs contact impervious to moisture so that it can be properly sanitized.

*****Correct by 8/25/2016.

3.128

SPACE REQUIREMENTS.

In the trailer, the licensees have a wolf, a lynx, two mountain lion cubs(8 wks), and a bear that the licensee reports is seven months old. The licensees said that these animals are not used in animal acts at the current event and the licensees say that these animals have been in their trailer enclosures at all times for this event. They advised that they have not let the animals out of their primary enclosure during this event for exercise. The enclosures for these animals allow only minimal postural adjustment, however do not provide sufficient space for regular exercise or species specific postural adjustments. No opportunity for regular exercise does not provide animals with adequate freedom of movement and can lead to animals' debilitation and behavioral problems caused by stress from restricted movement. Licensees must provide these animals with opportunities for regular exercise and normal species postural adjustments for these animals in a secure area for a reasonable amount of time at least once daily.

*****Correct by 8/19/2016

Inspection and exit interview was conducted with licensees at the Illinois State Fairgrounds in Springfield, IL by VMO Welch and ACI Houser.

NOTE: A copy of "Policy 6: Space and Exercise Requirements for Traveling Exhibitors" and March 2016 Tech

Inspection Report

Note "Handling and Husbandry of Neonatal Nondomestic Cats" was left with the licensee.

The inspector completed this inspection report when Animal Care was transitioning to a new information management system. Because the inspector re-typed the inspection report into the new system when it was deployed, the "prepared by" date on this inspection report is different than the date the inspector prepared the original inspection report, which occurred on August 18, 2016.

Additional Inspectors

Compton Annmarie, Animal Care Inspector
