Type: ROUTINE INSPECTION
Date: 07-NOV-2017

3.31(a)

SANITATION.

There were accumulations of debris, feces, and wet bedding on the floor of 31 tubs and the majority of the 20 rack enclosures. Fresh hay was placed on top of feces and wet bedding. The accumulation of debris, feces and wet bedding exposes the guinea pigs to potential infections with bacteria, fungi, and parasites. Correct by ensuring that all primary enclosures are clean and sanitized often enough to prevent an accumulation of excreta, wet bedding, and debris. Additionally, ensure that all primary enclosures are sanitized at least once every two weeks. Correct by November 9, 2017.

This inspection and exit interview were conducted with the owner.
