2.1(a)(1) Critical

Requirements and application.

A search was conducted at the facility and when interviewed, the facility owner admitted that dog sales were conducted without face-to-face interaction. The facility owner disclosed that she has more than four breeding females and conducted internet sales of animals with shipment of animals to the purchasers. The licensee does not meet any exceptions or exemptions for the requirement for licensure under the Animal Welfare Act. According to Animal Care records and by the admission of the owner, an Animal Care inspector contacted the owner 8/16/2021. She was made aware of the need to be licensed and was provided with an application kit by USDA. However, she has not applied for a license and is currently not licensed.

Conducting regulated activity without a USDA license does not comply with the Animal Welfare Act or ensure that APHIS officials can assess the care of the animals. Continuing to conduct regulated activity without a license is a serious violation of the Animal Welfare Act.

Correct by promptly submitting an application for license by 12/04/24 and do not conduct any regulated activities until a USDA license/registration is obtained.

This inspection and exit interview were conducted with the facility representative.
