Type: ROUTINE INSPECTION
Date: 20-NOV-2023

3.28(c)(1)(iii)

Repeat

Primary enclosures.

Space. Inadequate space was being provided to enclosures housing weanling guinea pigs. Two orange weanling enclosures each measure 24 inches wide by 78 inches long or 1872 square inches of floor space. The top enclosure was housing at least 40 weanlings and the bottom enclosure was housing at least 38 weanlings. Can not house more than 31 weanling guinea pigs weighing up to 350 grams in this size enclosure.

In addition, there were 4 weanling enclosures housed in the wire enclosures with black plastic pans with inadequate space. These four enclosure each measure 32 inches by 20 inches or 640 square inches of floor space. These enclosures had 12, 14, 15, and 18 weanlings present. Can not house more than 10 weanling guinea pigs weighing up to 350 guinea pigs in this size enclosure.

Inadequate space can cause stress and increase aggression in animals which can lead to bites, scratches, ear chewing and other injuries. Licensee must ensure that guinea pigs are provided with at least the minimum amount of floor space per animal to prevent overcrowding. Remains uncorrected.

This inspection and exit interview were conducted with the licensee.
