Type: ROUTINE INSPECTION
Date: 13-FEB-2024

3.131(d)

Sanitation.

The facility does not have an effective pest control program. At least 5 mice were seen running behind, around, and in between the bars of the groundhog and Patagonian Cavy enclosures. An additional 3 mice were seen scurrying in and out of the hay that the groundhog was burrowed in. Pests like mice can carry disease, contaminate food and bedding, chew through wires, and create other hazards to the health and welfare of regulated species. Correct by establishing and maintaining a safe and effective program for the control of pests by March 31, 2024.

This inspection and exit interview were conducted with the licensee.
