2.40(b)(3) DIRECT

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

In the kennel facility there are three sheltered buildings and a whelping building. In building #3 there is one adult black female French Bulldog, no ID, The animal's toe nails are to the point of growing sideways and need to be trimmed. There is dark matter buildup on all the animals teeth surfaces and one tooth is fractured with movement when touched. In sheltered building #2 there is an adult male Pomeranian, chip # 49353A653F, who has brown and green matter on all it's teeth surfaces. On the left cheek gum line of this animal there is green discharge. The animal also has a open ulcer on it's left front paw . The two animals must be evaluated by the attending veterinarian and the dealer must maintain written documentation of the evaluation and all treatment.

Affects two adults Correct by February 13, 2015

2.40(b)(3) REPEAT

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

In sheltered building #3 there is one adult male Schnauzer approximately seven years old, chip # 492F5F1037, which has hair loss over it's rump area, back and under belly. The animal has matted hair around his prepuce (sheath) area. The animal has dark matter buildup on all teeth surfaces with green matter on the gum line. One adult male Schnauzer, chip #485C492957, has dark matter buildup on all teeth surfaces with matted hair spanning the upper and lower jaws lines. In sheltered building #2 there is one female Chihuahua, chip #006FB4897, whose right rear paw has an open puncture. These three animals need to be evaluated by the attending veterinarian. The dealer must maintain written documentation of the evaluation and all treatment.

Affects three adults.

3.1(f)

HOUSING FACILITIES, GENERAL.

On the southern exterior of the whelping building there are three ground enclosures, each containing two adults French Bulldogs. Each enclosure is constructed from varies forms of wire and metal panels which is attached to the building. Running the length of the three enclosures there is standing water. The water needs to be drained or

removed and maintained from the enclosures to ensure the animals stay clean and dry. Housing facility operators must provide for regular and frequent collection, removal, and disposal of animal and food wastes, water, other fluids and wastes, in a manner that minimizes contamination and disease risks. Housing facilities must be equipped with disposal facilities and drainage systems that are constructed and operated so that animal waste and water are rapidly eliminated and animals stay dry.

Affects six adults.

PRIMARY ENCLOSURES.

On the western exterior side of sheltered building #2 there is a two to three inch diameter hole in the building wall surface which needs to be repaired. This enclosure contains three adult animals. Attached to the exterior of the whelping building there are three outdoor ground enclosures, each containing two adults. The last enclosure has broken protruding wires. On the interior of the building there are raised wire enclosures. Two of the enclosures, containing two dogs each, have broken protruding wires. The broken wires and the hole in the wall could cause injury to the contained animals. The wires and hole need to be repaired to protect the health and welfare of the contained animals.

Affects nine adults.

3.11(c) REPEAT

CLEANING, SANITIZATION, HOUSEKEEPING, AND PEST CONTROL.

The kennel consists of three sheltered buildings and a whelping building. On the interior of sheltered building #2 and in the whelping building there is an accumulation of fly specks and spider webs on the light fixtures, pvc support framing, pvc water lines and around the window air conditioner. Premises where housing facilities are located, including buildings and surrounding grounds, must be kept clean and in good repair to protect the animals from injury, to facilitate the husbandry practices, and to reduce or eliminate breeding and living areas for rodents and other pests and vermin.

Affects ninety-four adults and forty-five puppies.

The inspection and exit briefing was conduct was conducted with the Representative.
