DAWN ANIMAL AGENCY

Type: ROUTINE INSPECTION

Date: 17-MAR-2016

### 3.75(a)

#### HOUSING FACILITIES, GENERAL.

There was a electric cord on the outside of the lemur enclosure which was hanging within the animals reach. This cord was plugged into an electric outlet above the lemur enclosure, however the cord was accessible to the animal, and there was debris and prints on the cord indicating the animals has contact with the cord. This is a hazard and can cause the lemur to become injured. Animal enclosures need to protect the animal from injury. The licensee attempted to secure the cord above the lemur enclosure and out of the animals reach however the cord fell back down into the animals reach. A more secure method must be established so to properly secure the cord.

### 3.125(a)

#### FACILITIES, GENERAL.

1. The run in shed in the camel pasture had areas in the roof that had gaps, and the insulation underneath was exposed. There was insulation also found on the ground. In addition, roofing material and supplies were being stored against the wall inside this shelter. This can pose a hazard to the animals as well as can cause injury if the insulation is ingested by the animals.
2. There were areas of the fencing for the goat enclosure which were jagged and broken, and had come apart from the horizontal support beam. This created a large gap underneath where the animals could possibly become injured. Fences need to be kept in good repair.
3. The fencing for the top alpaca enclosure was sagging downward. It had come apart from the top horizontal support beam and was sagging. All fences need to be kept in good repair in order to protect the animals from injury and properly contain the animals.
4. One alpaca was being kept in an enclosure which allowed him access to the back end of a storage trailer. The sides of the back door of this trailer were crumbling and falling apart, and jagged edges of the material were present. This could cause the animal injury. Enclosures need to be kept in good repair and must not allow animals

---

access to materials which they could ingest or cause injury.

5. The serval enclosure had a leak in the roof. The water was dripping into the enclosure and was being collected by a container on the floor in the middle of the enclosure. Animal enclosures need to be kept structurally sound and in good repair. This situation needs to be corrected.

### 3.129(a)

#### FEEDING.

The trailer being used to store the food for the hoof stock had areas of debris noted. The food was being stored on pallets, however there was a large collections of dirt and debris underneath. This can lead to contamination of the food sources, and can also indicate that there are pests in the area creating this condition. This can lead to the animals becoming ill. Areas being used for food storage must be kept clean and sanitary in order to protect the food sources.

\*\*\*\*\*Correct by April 1, 2016

### 3.130

#### WATERING.

The water bucket for the bottom goat enclosure was very dirty. There was a large collection of sand and dirt and debris noted. Access to clean drinking water in imperative for the health of the animals, and drinking dirty water can cause illness. Water receptacles need to be kept clean and sanitary, and should be cleaned as often as necessary to prevent dirt and debris buildup.

\*\*\*\*\*Correct by March 23, 2016

An exit briefing was conducted with the licensee.
