

Inspection Report

Kuipers Family Farm
1N318 Watson Road
Maple Park, IL 60151

Customer ID: **322627**
Certificate: **33-C-0527**
Site: 001
Kuipers Family Farm

Type: RE-LICENSE INSPECTION
Date: 04-MAR-2025

3.125(a)

Facilities, general.

The shelter within the enclosure containing 30 fallow deer had the metal paneling peeling from the wall in at least three spots with sharp edges/points protruding out into the enclosure. Sharp points can cause injury to the animals. All facilities must be maintained in good repair.

3.154

Environment enhancement to promote psychological well-being.

The facility does not have an environment enhancement plan in place for its birds. Not having an environment enhancement plan in place doesn't ensure the psychological well-being of the birds. The licensee must prepare an environment enhancement plan and have it approved by the attending veterinarian.

3.158(d)

Cleaning, sanitization, housekeeping, and pest control.

Approximately 15 wild starlings (not regulated) entered the enclosure containing two turkeys, one peacock, and five chickens. The starlings were defecating down into the enclosure below potentially contaminating the water and enclosure itself. A safe and effective pest control program must be established to eliminate the avian pests from entering and contaminating the enclosure.

This is a 1st Re-License Inspection for a Class "C" license. The inspection and exit briefing were conducted with the applicant.

All items must be in compliance within 2 more inspections or by 5/3/25 or the applicant will forfeit the license fee and must wait 6 months to reapply. Please contact your inspector to schedule your next Re-License Inspection.

Regulated activity can continue under your existing USDA license until it expires.

End of report.
