Type: ROUTINE INSPECTION
Date: 23-JUL-2024

2.131(c)(1)

Handling of animals.

A member of the public reported that a family member was scratched on both legs by a rooster while visiting the facility on May 13, 2024. During today's inspection, the USDA official asked the facility representatives about the incident. According to facility representatives, the incident did occur near the barn animal exhibit. The rooster was able to get outside of the exhibit and into the public pathway. When the members of the public attempted to walk around the rooster, the rooster jumped up and scratched the legs of a child. The incident was not observed by the facility. The member of the public notified them of the incident and the mother was provided a cleaning solution for the scratches, which were observed by the facility.

During public exhibition, any animal must be handled so there is minimal risk of harm to the animal and to the public, with sufficient distance and/or barriers between the animal and the general viewing public so as to assure the safety of animals and the public.

Corrected before the time of inspection by increasing fencing security measures and clipping flight feathers of the rooster.

This inspection and exit interview were conducted with facility representatives.
