Site: 001

HOWLING WOODS FARM

Type: ROUTINE INSPECTION

Date: 21-AUG-2017

3.1(a)

HOUSING FACILITIES, GENERAL.

The wolf-hybrids have created a large den underneath of their rear shelter building. The metal dig guard (fence panel) is now fully exposed on the interior portion of the earthen floor. Due to their digging of the den, the earthen floor inside of the shelter has collapsed underneath the dig guard thus leaving large openings present. These openings are large enough for the wolf-hybrids' feet and legs to fall through and cause injury should they walk in this area.

A method to shore up the floor must be provided to prevent another collapse. Additionally, the shelter must be kept in good repair to prevent injury of the wolf-hybrids that utilize this shelter building.

TO BE CORRECTED BY: SEPTEMBER 21, 2017

This inspection and exit briefing were conducted with the facility representatives.
