Site: 001
GODWIN'S GATORLAND, INC.

Type: ROUTINE INSPECTION
Date: 30-JAN-2018

2.131(c)(1)

HANDLING OF ANIMALS.

A portion of the barrier fence located on the left side at the opossum exhibit previously consisted of dense impassable vegetation. On today's inspection, a portion of this vegetation is no longer dense allowing this inspector to easily pass through this area and easily gain access to the opossum enclosure from the public walkway.

During public exhibition, any animal must be handled so there is minimal risk of harm to the animal and to the public, with sufficient distance and/or barriers between the animal and the general viewing public so as to assure the safety of animals and the public.

This barrier shall be made so it is not easily passable by the public to assure the safety of the animal and the public.

Correct by February 28, 2017

This inspection and exit interview were conducted with the Supervisor of the Animal Care Dept.
