Type: ROUTINE INSPECTION
Date: 06-FEB-2024

2.75(b)(1)

Repeat

Records: Dealers and exhibitors.

Records of disposition were incomplete for some animals recently sold or transferred from the facility:

***The disposition record for two ring-tailed lemurs did not contain the address of the individual to whom the animals were transferred on 12/2/2023.

***The disposition record for 1 red kangaroo and 4 Highland cattle did not contain the address of the individual to whom the animals were transferred on 11/7/2023.

***The disposition record for 2 Asian small-clawed otters and 1 dromedary camel did not contain the address of the individual to whom the animals were transferred on 12/5/2023.

***The disposition record for 5 Nilgai sold on 11/2/2023 did not contain the name or address of the person to whom the animals were transferred.

Accurate recordkeeping is important for veterinary oversight and animal traceability in the event of disease outbreaks or stolen animals. Correct by maintaining accurate and complete records of acquisition and disposition in accordance with the Animal Welfare Act.

2.134(b)

Contingency planning.

The facility's Contingency Plan is dated 11/8/2022. An annual review has not been documented since that time. Failure to review the contingency plan annually may result in the plan becoming out of date or obsolete. Correct by reviewing the facility's contingency plan at least once a year and by maintaining documentation of the review. Correct by: March 1, 2024.

3.80(a)(2)(ii)

Primary enclosures.

An outdoor enclosure housing 3 ring-tailed lemurs contained two heat lamps with exposed electrical cords. At the time of the inspection the heat lamps were on. Animals may chew on electrical cords, resulting in injury such as electrocution. Animals may also be burned by touching heat lamps. Correct by ensuring that animals are protected from having contact with heat lamps and electrical cords. Correct by: February 7, 2024. Corrected at the time of inspection.

Inspection Report

Environment enhancement to promote psychological well-being.

The facility's enrichment plan for nonhuman primates does not address the needs of infants and young juveniles. The facility currently has 5 ring-tailed lemurs including a breeding pair and one juvenile offspring. Primates, especially infants and young juveniles, have complex social and environmental needs. Failure to have a plan that addresses these needs can result in stress, poor development, and the development of abnormal behaviors. Correct by March 1, 2024 by updating the enrichment plan in collaboration with the Attending Veterinarian to address the needs of infant and young juvenile primates.

3.154

Environment enhancement to promote psychological well-being.

At time of the inspection this facility has not documented a written plan for environmental enhancement for birds, although they do provide enrichment for the resident birds. Birds have complex social and environmental needs, and failure to provide for these needs may result in stress, obesity, or the development of abnormal/harmful behaviors. Dealers, exhibitors, and research facilities must develop, document, and follow an appropriate plan for environment enhancement. The plan must be approved by the attending veterinarian and must address the social needs of birds, their environment, and special considerations for young birds, birds showing signs of distress, and social birds housed alone. Correct by: March 1, 2024.

This inspection and exit interview were conducted with a facility representative.
