PATRICIA M. SPERANDIO

Type: ROUTINE INSPECTION
Date: 17-JUN-2014

2.40(b)(2)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

(b)(2)

There was an adult, female Shih Tzu housed in the last adult sheltered housing area. The animal appeared thin, was lethargic and would not stand when prompted. The kennel staff removed her from her enclosure and positioned the dog in a standing position. The dog would not support her weight and sunk to a laying position. Upon palpation the dogs, ribs, vertebrae and hips were protruding and her gums were pale. The licensee stated that they had noticed the dog was underweight and had recently treated the dog for parasites. Abnormal behavior, extreme weight loss and lethargy may be the indication of a serious medical condition. The licensee shall obtain a written diagnosis and treatment plan from a licensed veterinarian. The prescribed treatment should be provided as directed and the treatment should be documented. All documents should be available at the time of the next inspection. TO BE CORRECTED BY THE CLOSE OF BUSINESS 6/19/14

3.2(b)

INDOOR HOUSING FACILITIES.

(b) Ventilation.

The office building also used as an isolation room housing 4 puppies had high ammonia levels. The ammonia burned the inspector's nose and was irritating to the eyes after lengthy exposure. Breathing air with high levels of ammonia can lead to health complications. The licensee shall provide sufficient ventilation to minimize odors and ammonia levels and to provide for the health and well being of the animals. TO BE CORRECTED BY: 6/24/14

3.11(d) REPEAT

CLEANING, SANITIZATION, HOUSEKEEPING, AND PEST CONTROL.

(d) Pest control. An effective program for the control of insects, external parasites affecting dogs and cats, and birds and mammals that are pests, must be established and maintained so as to promote the health and well-being of the animals and reduce contamination by pests in animal areas.

***** There is an accumulation of flies in the outdoor housing area. Flies can spread bacteria and disease. The
