Type: ROUTINE INSPECTION
Date: 23-JAN-2017

3.1(c)(1)(ii)

HOUSING FACILITIES, GENERAL.

A gate to the outside run area next to the west side of the whelping building contained numerous strands of protruding fence wire into the run. There was one black female chow chow named Ebony (DOB 2-1-2010, microchip # 492B60687A) within the run area. The sharp ends of the wires protruding into the run represent an injury hazard to dogs using the run. The protruding wire needs to be removed or repaired.

Correct by date: immediately (owner removed dog from affected run area during inspection .)

An outdoor run area on the southwest section of the sheltered animal building contained a large piece of rusting tin. The piece of tin was estimated to be approx 10 ft x 3ft in size. The section of tin was laying on the ground and contained several rusting and perforated areas along with exposed jagged edges. There were two dogs (Max - male fawn chow-chow, DOB 1-12-2016 Microchip #0A02047777 and Dolly- female black chow-chow, DOB 6-23-2011 Microchip #492C39332D) within the run area. The exposed rusting tin and jagged edges represent an injury hazard to dogs using the run. The described tin on the ground needs to be removed from the run area.

Correction by date : 01-24-2017

This inspection and exit interview were conducted with a facility representative.
