THE GORILLA FOUNDATION

Type: ROUTINE INSPECTION

Date: 15-APR-2019

3.75(c)(2) REPEAT

HOUSING FACILITIES, GENERAL.

There are some areas on the floors in the primary enclosures for the gorilla - trailers X and Y - where there is chipping and missing paint, especially around the toilets. Plans to make repairs have been appropriately delayed, since the last remaining gorilla on site will be leaving the facility within the next two months, and the priority at this time is training him to facilitate the transport. Repairing floors in his enclosure at this time would be disruptive and delay training efforts.

This regulation requires that surfaces in non-human primate enclosures be maintained and/or replaced on a regular basis in order to facilitate adequate cleaning. Failure to maintain and/or replace surfaces can impede cleaning, which may create unsanitary conditions.

This inspection and exit interview were conducted with facility representatives.
