KEENESBURG, CO 80643

Customer ID: **3516**
Certificate: **84-C-0019**
Site: 002
THE WILD ANIMAL SANCTUARY

Type: ROUTINE INSPECTION
Date: 07-FEB-2024

3.127(d)

Facilities, outdoor.

There were multiple holes and gaps underneath the perimeter fence. One gap by enclosure #31 was approximately 8-9". Another gap on the west side of the facility along the large hill was approximately 1 foot. Another gap by enclosure #27 was approximately 8-9". Gaps along the perimeter fence can allow unwanted animals to enter the facility and potentially harm the animals within. Also, if an animal escapes their primary enclosure, the perimeter fence may not be able to contain the animal with these size gaps. The perimeter fence must be constructed so that it protects the animals in the facility by restricting animals and unauthorized persons from going through it or under it and having contact with the animals in the facility, and so that it can function as a secondary containment system for the animals in the facility. Correct by 2/14/24.

This inspection and exit interview were conducted with the Facility Representative.

End of report.
