Type: ROUTINE INSPECTION
Date: 14-JAN-2016

3.77(g)

SHELTERED HOUSING FACILITIES.

Two fixed exhibits, one housing tamarins, the other lemurs, does not have a barrier between their primary enclosures and the public. The absence of a barrier may allow the viewing public to have direct contact with the non-human primates and this could lead to injury to both the animals and the public.

Fixed public exhibits housing non-human primates must have a barrier between the primary enclosure and the public that restricts physical contact between the public and the non-human primates.

To be corrected by February 12, 2016

An exit briefing was conducted with the owner.
