Type: ROUTINE INSPECTION
Date: 14-MAR-2017

2.40(b)(2)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

A female white exotic shorthair cat has dark material on the hair around both of the eyes. Closer examination of the eyes revealed that the upper and lower eyelids appear slightly swollen and reddened. A wet, yellowish colored discharge is attached the hair around both eyes and there is also a small amount of blood located in the inner and outer corners of the right eye. This cat is not currently receiving any veterinary treatment for the condition of her eyes.

Poor eye health could cause pain and discomfort to the cat and could lead to further health issues. This cat must be evaluated by a licensed veterinarian for a proper diagnosis and to establish an effective treatment plan. The diagnosis and treatment plan must be documented in writing and available for the inspector upon request. The licensee must ensure that all animals receive adequate veterinary care at all times.

Correction date: End of business March 18, 2017

Inspection and exit interview conducted with Kelly Maxwell, ACI and the facility representative.
