### 3.154

#### Environment enhancement to promote psychological well-being.

The licensee is missing the documentation of a complete species-appropriate environmental enhancement plan that is required for birds. There are domestic chickens, ducks, turkeys, geese, peafowl and Guinea fowl on the property. They are already providing adequate social grouping and some enrichment to the birds including substrate to scratch in, outdoor access and ample human interaction, but they lack a written plan approved by the attending veterinarian. The plan, at a minimum, must address social grouping, environmental enrichment, special considerations, restraint devices, and exemptions as described in 3.154. A species-appropriate plan for environmental enhancement is necessary to promote the psychological well-being of the birds on the premises.
