

## Inspection Report

Beverlys Pet Center Inc  
8356 Pines Blvd  
Pembroke Pines, FL 33024

Customer ID: 17771  
Certificate: 58-B-0584  
Site: 001  
BEVERLYS PET CENTER INC

Type: ROUTINE INSPECTION  
Date: 13-DEC-2016

### 2.75(b)(2)

#### RECORDS: DEALERS AND EXHIBITORS.

Records for animals at hand containing required information on acquisition/disposition information of these were found to be incomplete and/or missing. There were no records or information on the recent acquisition/disposition of 10 rabbits, 8 sugar gliders, 3 guinea pigs and 2 marmosets. The licensee shall make, keep, and maintain records or forms which fully and correctly disclose information concerning animals that were purchased or otherwise acquired, owned, held, leased, or otherwise in his or her possession or under his or her control, or which is transported, sold, euthanized, or otherwise disposed of by that dealer or exhibitor. The records shall include any offspring born of any animal while in his or her possession or under his or her control. The Record of Animals on Hand (APHIS Form 7019) and Record of Acquisition, Disposition, or Transport of Animals (APHIS Form 7020) are forms which may be used by the licensee to keep and maintain the information required by federal regulations. As required by federal regulations, the licensee needs to obtain/document the pertinent information on the missing transactions of the regulated animals identified above.

Correct by: March 13, 2017

### 3.75(c)(1)(ii)

#### HOUSING FACILITIES, GENERAL.

Several wire ties located throughout the capuchin monkey's primary enclosure/cage had exposed sharp points and edges, that were within reach of the regulated animal. Housing facilities for nonhuman primates (NHP's) must be kept in good repair, and they must protect the animals from injury and contain the animals securely. Primary enclosures for any NHP's must be free of jagged edges or sharp points that might injure the animals. The licensee immediately communicated the noncompliance to the store manager so it could be fixed. All exposed wire ties at the primary enclosure/cage must be replaced and/or fixed to prevent the potential of an injury to the capuchin monkey.

Complete by: December 31, 2016

This inspection and exit interview were conducted with the licensee, Mr. Gregg Rosenberg.
