RUBEN & EVA MAE RISSLER

Type: ROUTINE INSPECTION
Date: 17-JAN-2017

3.1(c)(3)

HOUSING FACILITIES, GENERAL.

***Most of the enclosures in the outdoor facility contained greater than a day's worth of fecal material. In most of the enclosures, it appeared that the amount of fecal material present made it difficult for the animals to avoid walking in it. According to the licensee, the outdoor facility may have last been scheduled for the feces to be picked up on Saturday. Floors made of dirt, gravel, grass or other similar material must be raked or spot-cleaned with sufficient frequency to ensure all animals the freedom to avoid contact with excreta. Hard surfaces with which the dogs come in contact must be spot-cleaned daily and sanitized in accordance with Sec. 3.11(b) of this subpart to prevent accumulation of excreta and reduce disease hazards. The licensee must remove the accumulated fecal material from these enclosures and ensure that all excreta is removed daily from primary enclosures to prevent soiling of the dogs contained in the primary enclosures, and to reduce disease hazards, insects, pests and odors. To be corrected by: January 18, 2017.

This inspection and exit interview were conducted with the licensee.
