Site: 001  
WHITE FENCE FARM

Type: ROUTINE INSPECTION  
Date: 13-DEC-2017

### 2.40(a)(1)

#### ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

The current written Program of Veterinary Care (PVC) last reviewed on 12/29/2016 is incomplete. The guidance in the written PVC is not complete regarding the vaccinations and internal parasites. The PVC states that the animals should be vaccinated for Clostridial diseases, but does not list the frequency the animals are to receive it. The attending veterinarian (AV) states under internal parasites twice yearly fecal exams, last fecal neg. There is no additional guidance if the animals have to be treated for internal parasites. Failure to include complete written guidance regarding these topics does not ensure the welfare of the animals maintained by the facility and may lead to failure in providing measures for preventing, controlling, and treating of diseases. Consult with the attending veterinarian and develop a complete and accurate written program of veterinary care that reflects the practices at the facility. All treatments and medications must have directions for use from the AV to include dosage, route of administration, frequency, or concentration listed on the PVC or available in the facility.

To be corrected by: January 5, 2017

### 2.75(b)(1)

#### RECORDS: DEALERS AND EXHIBITORS.

There were no records available during the time of inspection showing the required information on the acquisition of the 3 goats at the facility. Inspector was told by the animal caretaker that the goats had arrived at the facility sometime in June or July 2017. Maintaining a current records of animals, including those acquired and disposed of, is required in order to be able to accurately track animals being utilized in regulated activities and to ensure their humane care and use. Make, keep, and maintain records which fully and correctly disclose the required information regarding the acquisition and disposition of animals.

To be corrected by: December 19, 2017

### 3.125(a)

#### FACILITIES, GENERAL.

Along the back wall inside the shelter for the 3 goats is two screw heads protruding outward. The animals can get
