

## Inspection Report

Goldwood Kennels, Inc.  
9500 Dellwood Road North  
White Bear Lake, MN 55115

Customer ID: 544  
Certificate: 41-H-0001  
Site: 001

GOLDWOOD KENNELS, INC.

Type: ROUTINE INSPECTION  
Date: 28-JUL-2015

### 3.14(a)(6)

#### PRIMARY ENCLOSURES USED TO TRANSPORT LIVE DOGS AND CATS.

Construction of primary enclosures.

Two transport enclosures containing one adult dog in each (airway bill 48327602) had lettering for the words 'Live Animals' that were less than 1 inch high on the top of the enclosure. The lettering measured only 1/4 of an inch high.

This may negatively affect the animals' safe transport since the small lettering may not be noticeable. Improper labeling of transport enclosures could lead to improper handling of the animals during transit thereby increasing the risk of injury or discomfort. Accept for transport only primary enclosures that are properly labeled on the top and one or more sides with the words 'Live Animals' in letters at least 1 inch high, and with arrows to indicate the correct upright position of the enclosure.

### 3.16(c)

#### FOOD AND WATER REQUIREMENTS.

Food and water receptacles.

One of the food/water receptacles for a transport enclosure containing an adult dog (airway bill 48327602) was loose on the floor of the enclosure. The receptacle is not securely attached to the inside of the primary enclosure so that it can be filled from the outside without opening the door. This could affect the health and comfort of the dog since feeding and watering is limited to a single receptacle since the other one cannot be used or could result in escape, if the door is opened to feed or water the animal. Accept for transport only primary enclosures with securely attached food and water receptacles so that the animals may be safely fed and watered without escaping their transport enclosure.

Inspection conducted at United Airlines cargo area at Minneapolis-St Paul International Airport.

Exit interview conducted with facility representative at cargo area.
