Type: ROUTINE INSPECTION

Date: 16-JUN-2021

3.125(a)

Facilities, general.

During this inspection it was noted that the enclosure that housed 2 goats, 2 pigs, 3 sheep was in need of repair. The enclosure is constructed of hog panel fencing and a small wire mesh attached to these panels. However, the small wire mesh has begun to detach from the panels and is bowing upwards along the bottom edge. There is also a section, in the upper right corner, where the welds have broken and there are large gaps in the panels. To ensure that the animals are securely contained and unwanted animals can not enter this fencing will need to be addressed.

***To Be Corrected By: August 1, 2021

This inspection and exit interview were conducted with a representative of the licensee.
