Po Box 267
Gadsden, AL 35902

Customer ID: **3027**
Certificate: **64-C-0204**
Site: 001
CITY OF GADSDEN

Type: ROUTINE INSPECTION
Date: 14-FEB-2017

3.50(a) REPEAT

FACILITIES, GENERAL.

** There was a rabbit that was outside of the rabbit box but inside the barn during the inspection. This rabbit belongs in the enclosure but was able to hop out. The animals shall be contained in an enclosure that is structurally sound and designed to adequately contain that species to prevent them from being injured or harmed.

3.75(c)(3)

HOUSING FACILITIES, GENERAL.

*** In the ring tail lemurs enclosure on the floor there was a pile of old feces that had not been picked up in a couple of days. Hard surfaces with which nonhuman primates come in contact must be spot-cleaned daily and sanitized to prevent accumulation of excreta or disease hazards. If the species scent mark, the surfaces must be sanitized or replaced at regular intervals. Contaminated material must be removed or replaced whenever raking and spot cleaning does not eliminate odors, diseases, insects, pests, or vermin infestation. All other surfaces of housing facilities must be cleaned and sanitized when necessary to satisfy generally accepted husbandry standards and practices. Correct by February 21 ,2017.

3.125(a) CRITICAL REPEAT

FACILITIES, GENERAL.

*** The enclosure containing the arctic foxes had been penetrated from within on February 9, 2017. The foxes burrowed out of the enclosure and escaped the facility. They burrowed down beneath their den at least two feet and out of the enclosure about 3 - 4 feet passed the fence line. Three days later one fox returned with mild seizures and was treated by the Attending Veterinarian immediately. The second fox returned the next day with a broken right rear foot which was also treated by the Attending Veterinarian promptly. Five of the remaining foxes have not returned and the facility has laid traps and bait to attempt to catch them. The facility has revamped the enclosure by extending the fence vertically 4 - 5 ft below the ground into concrete to prevent the current foxes from escaping. The facility must be constructed of such material and of such strength as appropriate for the animals involved. The outdoor housing facilities shall be structurally sound and shall be maintained in good repair to protect the animals from injury and to contain the animals.
